NETWORK, LEARN AND JOIN THE FUN

Do you want to meet new people, exchange ideas and learn some new tricks of the trade from other allied health professionals? The AMT Annual Meeting will take you on new challenges and help you develop leadership skills that can benefit both you and the profession. At the AMT Annual Meeting you can expect to:

- Update and expand your knowledge base
- Earn up to 16 hours of CE
- Connect with a diverse network of professionals
- Develop a deeper understanding of how AMT operates and how you can get involved to make a difference both nationally and locally
- Have fun at multiple social events, including a Monday night Welcome Reception, Awards Banquet, and one-of-a-kind event at the Indian Pueblo Culture Center

WHO SHOULD ATTEND?

This meeting is for all AMT members and allied health professionals who are interested in growing their skills and knowledge in medical assisting, phlebotomy, medical laboratory science, and leadership. No matter what stage of your career, AMT’s Annual Meeting is an essential part of your professional development journey. AMT has it all for you!

Register today at www.americanmedtech.org.

### LEGEND

- **Continuing Education**
- **Business Meetings**
- **Social Events**
LOCATION
The AMT 2020 Annual Meeting will be held July 13-16 in beautiful and scenic Albuquerque, New Mexico, a true gem of the southwestern United States. You won’t want to miss taking in the desert sites and culture of this amazing city with something for everyone, from nature hikes on the Sandia Peak to shopping downtown to outstanding food. For a list of activities in and around the Albuquerque area check out page 24 in this Preliminary Program or visit www.visitalbuquerque.org.

CONTINUING EDUCATION
Earn up to 16 hours of CE throughout the course of three days, in four tracks:
1. Laboratory (11 sessions planned)
2. Leadership & Professional Development (11 sessions planned)
3. Medical Assisting (11 sessions planned)
4. Other Allied Health Professions (3 sessions planned)

To receive CE credit, keep track of your CE session attendance on your Individual CE Recording Form and then enter each session and contact hours in the AMTrax system on AMT’s website at www.americanmedtech.org. Be sure to retain your CE Recording Form for auditing purposes.

Credits earned at the AMT Annual Meeting are accepted by the State of Florida (CE Broker #50-2206) and State of California (Provider #0061) for MT, MLT, and RPT licensure renewal. (Please note that only laboratory-related sessions are eligible for credit in Florida.)

PRESENTATION HANDOUTS
No printed handouts will be distributed in education sessions. All meeting handouts will be available for download near the time of the Annual Meeting. An AMT log-in is required.

REGISTRATION
• Register online at www.americanmedtech.org. This is the quickest and easiest way to register and receive the best rates!
• Mail/Email Form
  Complete the form at the end of this program and mail or email it to the address noted below. Payment must be included.
  AMT 2020 Annual Meeting
  10700 W. Higgins Road, Suite 150
  Rosemont, IL 60018
• Onsite
  Registration will be available onsite in Albuquerque from July 12–15. Please note that onsite registration fees will be at a higher rate.

Refunds
If the meeting is canceled due to COVID-19 all registration fees will be refunded in full.

Please note: Tickets for all social events need to be purchased separately unless a full package or guest full package is purchased.
The Thursday night social event is not included in the Full Package.
TRAVEL

Hotel Accommodations
A block of rooms has been reserved at the Hyatt Regency Albuquerque, 333 Tijeras Ave NW, Albuquerque, NM at a group rate of $129/single/double occupancy. Reservations may be made by calling 1-888-421-1442 and asking for the AMT 2020 Annual Meeting Room Block. You can also book directly online at https://www.hyatt.com/en-US/group-booking/ALBUQ/G-AMTN. The reservation deadline is June 15, 2020. Reservations after this date may be at a higher rate. Attendees are encouraged to book early.

Air Travel
Purchase your air travel to and from Albuquerque International Sunport airport (ABQ). The Hyatt Regency Albuquerque is approximately a 20-minute ride from the airport.

Ground Transportation
Parking
Free self-parking is available at the hotel, valet parking is $22/day.
No discounted shuttle services are available in Albuquerque. However, the following taxi companies are available as are the ride share services of Uber and Lyft. Please download the ride share apps on your mobile phone for details and scheduling.

Taxi Services
Yellow Cab Company
(505) 247-8888

ABQ Green Cab Company
(505) 243-6800

Accessible Services
AMT is not responsible for the receipt, storage, or return of any accessibility equipment.

Wheelers Accessible Van Rentals
800-456-1371

Accessible Vans of America – ABQ
888-433-3904

United Access (Wheelchair Getaways)
877-501-8267

Enterprise Specialty Rentals
866-255-4284

Waiver of Liability
Each individual attending the AMT 2020 Annual Meeting assumes all risks associated with his/her attendance and participation in all on- and off-site activities that are part of the AMT 2020 Annual Meeting. By registering for this meeting, you agree to indemnify, defend, and hold harmless the AMT, its officers, directors, employees, and agents from all loss, damages, costs, expenses (including reasonable attorney’s fees), or liability arising out of or related to your attendance and participation at the AMT 2020 Annual Meeting, including without limitation, any damage caused by you or any of your guests to any venue utilized by AMT for the AMT 2020 Annual Meeting.

Photograph / Video / Recording Release
AMT has official photographer/videographers for its AMT Annual Meeting that are authorized by AMT to take photos, videos, or make other recordings (“Recordings”) of attendees at AMT Educational Program and National Meeting events, or of people participating in functions or activities of the AMT Annual Meeting. AMT may use the recordings in future marketing, publicity, promotions, and advertising. By registering for the AMT 2020 Annual Meeting, you consent and agree to allow AMT to use the recordings, which may include you, your family members, or other guests (including individuals under the age of 18), in all media formats worldwide for whatever purposes AMT deems appropriate.
### KEYNOTE ADDRESS
**9:00 am – 10:00 am**

**2001 Targeted Workforce Solutions for Healthcare**
Bill McCamley, Cabinet Secretary for Department of Workforce Solutions
1.00 CE Hour

AMT’s 2020 Keynote presenter, Bill McCamley, will discuss the shortage in healthcare workers and share some of the reasons contributing to the shortage, including teacher salaries, clinical opportunities, gender roles, lack of high school pathways, etc.

After attending this session, you will be able to:
- Discuss the shortage of healthcare workers in the U.S.
- Explain the strategies that New Mexico applied to deal with their healthcare worker shortages

**About Bill McCamley:**
Bill McCamley was a Las Cruces-area state representative from 2012 through 2018. He was chairman of the House Labor and Economic Development Committee, where he oversaw progress on critical issues like wage theft and increasing the minimum wage. He has been a statewide leader in job creation activities like workforce training, border trade, and cannabis legalization. He earned a degree in government from New Mexico State University in 2001 and also graduated from the John F. Kennedy School of Government at Harvard University with a master’s degree in public policy in 2003.

Born in Korea, and the son of a U.S. Army servicemember, McCamley served as a Dona Ana County Commissioner for four years and as Executive Director of the New Mexico Rural Development Council, where he worked with small communities across the state on job creation, education, and housing projects.

He also has experience in the private sector, in both the solar industry and as Sales Director for ROJO Ink, a company that donated 10% of promotional item sales to feed hungry families in Africa and Haiti.

### BREAKOUT SESSIONS
**10:30 am – 11:30 am**

**2002 Developing a GI Academy**
Emma Townsend Rogers, RMA, AGTS
1.00 CE Hour

This session will provide an overview of a model to improve teamwork, increase employee engagement, and expand staff knowledge. The “GI Academy” is a method of ongoing education for all staff members consisting of mini expert groups and can be applied to any practice setting.

After attending this session, you will be able to:
- Discuss the vision of the GI Academy
- Discuss the importance of staff and management collaboration in the development of the GI Academy
- Discuss the expectations and involvement of staff and managers in the GI Academy

**2003 Lung Physiology with COPD**
Eugene Demekhin, BBA-HC, AHI(AMT), RRT, RCP
1.00 CE Hour

This session examines normal lung physiology and the abnormalities found in COPD cases, such as chronic bronchitis and emphysema. Diagnostic studies and clinical assessment will also be included.

After attending this session, you will be able to:
- Identify and describe COPD signs and symptoms and diagnostic testing
- Describe the anatomical alterations in common COPD diseases
- Discuss the treatment modalities for chronic bronchitis and emphysema
2004  **Antibiotics and Methods of Antibiotic Susceptibility Testing**  
   Zenaida Maraggun, MT(AMT)  
   1.00 CE Hour

In an era when many patients have come to expect an antibiotic prescription to knock out their often-unpleasant bacterial infections, some non-susceptible organisms demand vigilant microbiology attention. A challenging procedure performed in clinical microbiology and health care providers need to understand the “antibiotics.”

After attending this session, you will be able to:
- Differentiate the methods of antibiotic susceptibility (AST) testing in microbiology
- Identify the different groups and classes of antibiotics
- Describe the mode of actions of antibiotics
- Explain the practices that promote resistance to antibiotics

---

2005  **Respecting Patients with Cultural Humility**  
   Rikkisha Gilmore-Byrd, MPH, MS & Reyna Gilmore, MD  
   1.00 CE Hour

This session will address communication and how it is essential that healthcare providers adequately communicate with patients from medically vulnerable populations. Racial/ethnic, sexuality, and sexuality/gender health disparities will be discussed, including linkage to poor health outcomes and lower quality care. Cultural humility will be discussed when working with patients and how the patient should guide the conversations based on their uniqueness, rather than assuming that all members of a culture conform to a certain stereotype.

After attending this session, you will be able to:
- Explain the value of cultural humility and its practical application in allied health
- Describe the dynamics of difference
- Reflect on the knowledge, skills, and attitudes which are associated with becoming culturally self-aware and valuing diversity

---

2006  **Are You Nice or Kind?**  
   Jewell Taylor-Zweegman, LMT, MR, CSMT, WLS  
   4.00 CE Hours

Which would you say? Are you “nice” or “kind,” or are you both? Which one would you be “best” at? This session will take you down a humorous route of finding out which you are best at and whether others would agree with you. Come and have a great time looking at the past, present, and future you as we find out are...“Are You Nice?” or “Are You Kind?”

After attending this session, you will be able to:
- Define nice and kind
- Apply knowledge into your life skills
- List the vital things that make you nice and what makes you kind

---

2007  **Prostate Ponderings**  
   Tracy Mixdorf, DO, MHCA  
   1.00 CE Hour

The prostate is an organ that causes a lot of difficulties for the aging male. After attending this session, the learner will have a better understanding of the anatomy and physiology of the prostate. They will be able to decipher benign and cancerous prostate abnormalities. The learner will know what the latest recommendations for screening for prostate abnormalities are so they can better counsel the male patient on these options.

After attending this session, you will be able to:
- Identify the anatomy and physiology of the young vs. aging prostate
- Explain the options for screening for prostate abnormalities
- Discuss who should be screened for prostate abnormalities

---

**WORKSHOP** 1:00 pm – 5:00 pm

**BREAKOUT SESSIONS** 1:00 pm – 2:00 pm

Lunch (On Your Own)
2008 Competency-Based Education in Allied Health Education
Henry Oh, PhD, MT(AMT), AHI(AMT)
1.00 CE Hour
This session will introduce different innovative teaching strategies, but with an emphasis in competency-based education (CBE). Topics include: CBE and its comparison with other teaching strategies such as flipped classroom, blended learning, case-based learning, problem-based learning and project-based learning along with the steps to develop a CBE; the role of the faculty in CBE; assessment and evaluation of effectiveness of CBE.
After attending this session, you will be able to:
• Describe competency-based education as applied to allied health education
• Identify the similarities and differences of competency-based education to other innovative teaching strategies
• Demonstrate a basic design of competency-based education

2009 Serum Freelite Chains Aid in the Diagnosis and Monitoring of Monoclonal Gammopathies
Debra Gall, MBA, MT(AMT)
1.00 CE Hour
Components of the immune system will be reviewed to set the stage for contrasting plasma cells in normal responses vs. Multiple Myeloma clinical presentation. The importance of early diagnosis by Freelite Chains and patient impact and complications will be discussed. The incidence of Free Kappa and Free Lambda will be highlighted and diagnosis and monitoring. The analytical sensitivity of traditional tools and Freelite will be contrasted. The Multiple Myeloma diagnostic criteria will be detailed (CRAB and SLiM) criteria (Myeloma defining events).

2010 Technical Consultants: Requirements, Responsibilities, and Career Development
Margaret Blaetz, CLC, MLT
1.00 CE Hour
This session will review the qualifications and responsibilities of a technical consultant and further explain how obtaining a CLC(AMT) certification will enhance the career opportunities available.
After attending this session, you will be able to:
• Describe roles and responsibilities of a technical consultant
• Explain the education and knowledge required for a technical consultant
• Describe the path to AMT certification for laboratory consultants

BREAKOUT SESSIONS 2:15 PM – 3:15 PM
2011 The Use of Social Media Outlets in Healthcare
Deborah Janeczko, MEd, RMA(AMT)
1.00 CE Hour
This session will discuss the use of social media in the medical workplace.
After attending this session, you will be able to:
• Describe how prevalent is the use of social media in the medical workplace
• Explain what social media venues are useful in the medical workplace and the pros and cons of using social media in the medical workplace
• Identify the legal facts related to using social media in the medical workplace
Personnel are the single most decisive factor in the success of your laboratory. It doesn’t matter how good the equipment is if you don’t have qualified, trained employees to appropriately use it. With continued financial pressure and demand of having to do “more with less,” recruiting (or keeping) the most valuable individuals for your laboratory is crucial. How do you find the “right” employee for the job? How do you ensure adequate training to ensure their success? How do you maintain competency and encourage professional growth? In this session, you will be introduced to practical ways to find, train and build a laboratory staff that is caring and committed to excellence in laboratory testing.

After attending this session, you will be able to:
- Describe how to effectively recruit high performing staff and motivate current employees
- Develop effective job descriptions, training/on-boarding, and meaningful competency assessment for lab personnel
- Discuss ways to provide mentoring and ongoing support to create a high performing laboratory team

This wet-lab style presentation extracts the DNA from Kiwi and precipitate it for visualization of the purified DNA Extract. A high-level view of PCR steps and concepts will be presented alongside a guided lab in the often left out topic, how does one get the DNA to replicate with PCR.

After attending this session, you will be able to:
- Describe common steps in Polymerase Chain Reactions and its laboratory applications
- Use standard laboratory practices to purify DNA for further testing with PCR
- Identify PCR techniques developed to overcome inherent problems in PCR Testing
Day 2  
Tuesday, July 14

**WORKSHOP 8:00 am – 12:00 pm**

**2016 Medical Assisting Clinical Skills Workshop**
Jill Anderson, RMA(AMT), AHI
4.00 CE Hours

This workshop is designed to practice, develop, and master clinical skills performed in the ambulatory care setting.

After attending this session, you will be able to:
- Measure and record blood pressure, respirations, and pulse oximetry
- Administer parenteral medication: a. Intramuscular b. Intradermal
- Perform first aid procedures for: a. Bleeding b. Diabetic coma or insulin shock c. Seizures

**BREAKOUT SESSIONS 8:30 am – 9:30 am**

**2017 Laboratory Values Interpretation for the Medical Assistant**
Laura Gilbert-Caret, MBA, MT(AMT)
1.00 CE Hour

This session will concentrate on learning the meaning of common laboratory tests and results and how they may relate to the patient’s condition. We will focus on the importance of a good laboratory blood sample as it relates to Point-of-Care testing and tests sent to the hospital or reference laboratory. In addition, how critical laboratory test values are determined, and why they are important will be discussed.

After attending this session, you will be able to:
- Discuss the importance of some of the most common lab tests and how they relate to the patient’s condition
- Explain basic interpretation of common laboratory tests results
- Discuss the importance of a good laboratory blood sample

**2018 Quality Control**
Collin Reynolds, RMA(AMT)
1.00 CE Hour

This session will provide an overview of quality control and why it is important to medical assistants in a clinical job. Topics include keeping record of machines, medication, and tests being performed including ensuring they have been tested, not expired.

After attending this session, you will be able to:
- Identify proper documentation
- Discuss the importance of quality control
- Describe quality control and what it means to patients

**2019 Mythbusters: Phlebotomy**
Jeffrey Lavender, MBA, MT(AMT), U.S. Army Sergeant Major (Retired)
1.00 CE Hour

Phlebotomy is a largely unlicensed field in the United States. Because of this, there is a lot of absent and poor information and training among our phlebotomists. Bad habits are formed. Myths are created and passed around. This session will confront some of those myths and attempt to prove or debunk them. Attendees are welcome to bring their own myths to discuss as well.

After attending this session, you will be able to:
- Identify common myths purported in phlebotomy
- State and utilize methods to prove or debunk these myths
- Discuss common myths and their validity
**2020**  
**Soft Skills for Hard Jobs**  
Julie Lavender, EdD, MS, RN  
1.00 CE Hour

Soft skills. Social Intelligence. Interpersonal skills. These are some buzz terms heard from potential employers regarding attributes that they are looking for when hiring new employees. In this session, you will be guided through a review of some of the most commonly identified soft skills. You will have opportunities to “practice” these skills in this active learning session. At the end of the session, attendees will have tools to develop a plan to enhance their own soft skills.

After attending this session, you will be able to:
- Identify commonly identified soft skills
- Practice some of the common soft skills identified by employers
- Develop a plan to enhance your own soft skills

**2022**  
**Impact of Laboratory Medicine on Critical Access Hospitals Revenue and Care Strategies**  
Alexandra Sparks, MLT  
1.00 CE Hour

Critical access hospitals often have to be more creative in how they earn their revenue in order to keep their doors open. Laboratory services can be a major contributor in bringing money into these facilities and can even improve patient access to testing. This session will demonstrate some of the successful methods that a small critical access hospital has utilized so that perhaps some strategies could be implemented in other such facilities.

After attending this session, you will be able to:
- Discuss the restrictive nature of the capabilities of a critical access hospital
- Explain various methods a facility has managed to bring in revenue
- Describe how reduced turnaround time impacts patient outcomes

**2023**  
**Quality Programs**  
Terri Breitwieser, BSMA, MT, AHI(AMT)  
1.00 CE Hour

This session will present how to develop and set up quality assurance programs. It will also review how to develop thresholds to design markers, which provide useful information in a dashboard system to monitor an overall summary of the laboratory operations.

After attending this session, you will be able to:
- Develop realistic thresholds and compliance measures
- Discuss ongoing measures, needs assessments, and reporting aspects
- Explain how to keep staff in compliance

---

**BREAKOUT SESSIONS**  
**9:45 am -10:45 am**

**2021**  
**The Link Between Diabetes and Heart Disease**  
Anna Jannak, RN, MSN, FNP-C  
1.00 CE Hour

Over 25% of our population has been diagnosed with diabetes and up to seven million have undiagnosed diabetes. This disease is not just about blood sugar levels and abstaining from sweets. Undiagnosed or poorly controlled diabetes leads to damage to blood vessels and nerves that can lead to heart disease. Based on current guidelines, the information in this session will help allied health professionals’ information regarding diagnostic tests and techniques, current treatment options, and tips and tricks for working with this patient population.

After attending this session, you will be able to:
- Describe the methods used to diagnose diabetes mellitus
- Discuss treatments for diabetes based on current guidelines

**10:00 am - 2:00 pm**  
**Delegate Credentialing**
2024  Colorblindness: So, You Really Can’t See Me?
Denita Harris, PhD
1.00 CE Hour
As we examine some of the fields in public service, such as education, law enforcement, and health, we often wonder if biases and racism truly exist. How can any professional serving in any one of these professions be colorblind? Some are led to believe that those who have a role in public service would have to be colorblind in order to even desire to be in that profession. Come learn why colorblindness is a myth and no matter what area of public service one might find themselves in, if the acknowledgement of race, privilege, and power is not checked at the door, racism will continue to persist in our society and in public service professions.

After attending this session, you will be able to:
• Define and identify how race, privilege, and power “show up” in the health profession
• Describe how to effectively “check their privilege” at the door by acknowledging that there is no such thing as being colorblind

BREAKOUT SESSIONS  11:00 am - 12:00 pm
2025  Functional Neurological Disorder: What Is It and How to Help Those Who Have It
Carol Champagne, RMA(AMT)
1.00 CE Hour
One in four patients attending neurology outpatient clinics is diagnosed with Functional Neurological Disorder. This session will explain what this common disorder is and is not. Symptoms, diagnosis, and treatment will be discussed. Due to a lack of understanding of this disorder, many patients are left with poor knowledge of their problems and go without proper treatment. This session will discuss real-life case studies and how patients were both helped and harmed by a proper and improper approach to the explanation of their disorder by not only the physician but the medical support staff, especially medical assistants working closely with the patient.
After attending this session, you will be able to:
• Describe Functional Neurological Disorder
• Explain the Functional Neurological Disorder to patients
• Describe how to help patients follow through with treatment, through encouragement and motivation skills

2026  Significance of Rapid Identification of Tick-Borne Infection
TBD
1.00 CE Hour
This session will review the transmission of “bugs” through various means including transfusion and a rare proven transmission of Anaplasma through blood products.
After attending this session, you will be able to:
• Explain the prevalence of Anaplasma, Babesia in the Northeast
• Describe the effect of said infections on transfusion medicine

2027  Surviving Zombie Attacks
Kathleene Hardy, AS, RMA(AMT) & Jo Anne Koch Owens, MT(AMT)
1.00 CE Hour
Planning and leadership are critical in surviving a disaster. Preparation takes coordination and cooperation throughout the medical facility and, if appropriate, the local community as part of a comprehensive disaster plan. Providing disaster training and resources for employees not only benefits the employees. Supporting employees in preparing personally offers the facility the advantage of employees that are motivated and prepared to provide support to the facility when needed, knowing they are totally prepared at home. This presentation will help to prepare you personally and professionally for the zombie apocalypse.
After attending this session, you will be able to:
• List five steps needed to prepare for a zombie attack (natural disaster)
• List five reasons individuals avoid preparing for a zombie invasion (disaster)
• List five actions needed in preparing a facility for a zombie invasion (disaster) plan
2028  Government Affairs Roundup
Michael N. McCarty, JD; Kimberly A. Cheuvront, PhD, MBA, MT(AMT, ASCP), Robert Newberry, MT(AMT)
1.00 CE Hour

The panelists will present an update on legal, legislative, and regulatory policy issues affecting AMT professionals at both the federal and state levels. They will also discuss the national political landscape leading up to the 2020 Presidential election. The presentation will be followed by an interactive discussion with attendees on current policy issues of interest to them.

After attending this session, you will be able to:
• Discuss policy developments affecting the structure of the American healthcare delivery system
• Advocate on current federal policy developments affecting payment for, and regulation of, clinical laboratory services
• Describe state legislative and regulatory developments affecting the practice of AMT-certified disciplines

2029  The Resilience Advantage™: Skills for Personal and Professional Effectiveness
Shelly Fischer, PhD, RN, NEA-BC, FACHE
4.00 CE Hours

Since 1991, HeartMath® has researched and refined a set of unique tools and proprietary technology designed to measurably improve resilience, performance, health and productivity, while dramatically reducing stress. Published studies and hundreds of client outcomes confirm significant, sustained improvements in stress levels, cognitive state, emotional well-being, and physiology incorporate, government and health care settings around the world.

After attending this session, you will be able to:
• Increase personal resilience and energy levels and your ability to maintain situational awareness
• Leverage your ability to think clearly under pressure and discern appropriate solutions to problems
• Diminish symptoms of personal and professional stress such as confusion, fatigue and sleep disturbance

1:00 pm – 5:00 pm

WORKSHOP

11:30 am – 1:00 pm  Medical Assisting Student Challenge Bowl

2030  Complex Regional Pain Syndrome/ Reflex Sympathetic Dystrophy
Bindu Pillai, MBBS, RMA
1.00 CE Hour

Have you ever felt your hand or foot on fire 24 hours a day, 7 days a week? Patients with Complex Regional Pain Syndrome (CRPS) endure this on a daily basis. There is no cure for CRPS but instead there are a combination of treatments that temporarily manage the symptoms. This session will cover the types of CRPS, causes, symptoms, pathophysiology, diagnosis, prognosis, and management. Additionally, this session will increase awareness of this rare and new disorder.

After attending this session, you will be able to:
• Distinguish the different types of CRPS
• Describe the symptoms of CRPS
• Explain the different treatment modalities of CRPS
**EKG: Technique and the Importance of the ST Segment**

Diana Kendrick, RMA(AMT), AHI(AMT), RN

1.00 CE Hour

The session will discuss the Electrocardiogram, the medical assistant’s role, proper lead placement and changes, patient assessment, the cardiac cycle, and the importance of the ST segment.

After attending this session, you will be able to:
- Describe the role of a medical assistant in EKG
- Explain the importance of lead placement and changes
- Explain the electronic cardiac cycle

---

**When It’s More Than Just a Headache: A look at Meningitis and Encephalitis**

Cherry-Ann Da Costa-Carter, MSc., MPH, MT(AMT), RPT(AMT)

1.00 CE Hour

The session will show the differences between encephalitis and meningitis. Some of the common causes of Meningitis and Encephalitis will be discussed, including clinical and diagnostic means of identification. Current events leading to increased rates of prevalence, morbidity and mortality of Eastern Equine Encephalitis (EEE) will be examined, along with effective control measures to eliminate insect vectors.

After attending this session, you will be able to:
- Describe the difference between Meningitis and Encephalitis
- Discuss common viral and bacterial pathogens which cause Meningitis and Encephalitis and how they are identified clinically and diagnostically
- Describe recent cases studies of EEE and determine effective control and treatment measures

---

**Employee Management**

April Biles, RMA(AMT), AHI(AMT)

1.00 CE Hour

This session will cover several employee management topics, including hiring staff, interviewing techniques, training, evaluating staff, etc.

After attending this session, you will be able to:
- Describe how to effectively hire staff
- Explain the importance of employee policies and procedures
- Discuss how to manage office conflict

---

**Pre-Certifications and Prior Authorizations, Oh My!**

Susan Phillips, RMA(AMT)

1.00 CE Hour

This session will define prior authorizations and pre-certifications. The instructor will help you through the processes of Medicaid, HMOs, and private insurance. You will be walked through the steps to obtaining various authorizations.

Learn what to do if you are denied and what this means to the business’ bottom line. Learn how patients can depend on their insurance through you at the pharmacy. Learn how to get approval for inpatient procedures, outpatient procedures and durable medical equipment. Relieve the intravenous medication confusion and let your patients receive the treatment they need.

Help your doctors give the best patient care the patients deserve.

After attending this session, you will be able to:
- Define prior authorization and pre-certification
- Describe how to obtain a prior authorization or pre-certification
- Explain how to deal with denials, appeals, and reimbursement issues
Recent genetic analyses of large populations have revealed that somatic mutations in hematopoietic cells leading to clonal expansion are commonly acquired during human aging. Clonally restricted hematopoiesis is associated with an increased risk of subsequent diagnosis of myeloid or lymphoid neoplasia and increased all-cause mortality.

After attending this session, you will be able to:
• Discuss somatic mutations
• Explain the value of CHIP in diagnostic medicine
• Discuss the value of CHIP in pathologic conditions

This session will describe the role of the Medical Technologist in managing tissue storage for hospitals. Joint Commission inspects tissue management during the lab inspection process and Medical Technologists are being asked to monitor the quality processes that are involved.

After attending this session, you will be able to:
• Explain the FDA and Joint Commission requirements of tissue storage
• Describe the types of implants
• Explain the technology that is available to meet standards

Medical leadership is vitally important to delivering high-quality care to patients. Medical leadership skills have traditionally been given less credence than technical or academic ability, though there are signs that this is changing. Courses, programs, and schemes can use a variety of methods to develop medical leaders, including mentoring, coaching, networking, and action learning. Leadership training is most beneficial to individuals and organizations if it occurs alongside “real-time” experiential learning. Important skills for medical leaders to possess include leadership, resourcefulness, composure, adaptability to change, and participative management. Trends in leadership development incorporate holistic approaches, succession planning, leadership assessment, career pathing, training and development planning, mentoring and coaching. Leadership approaches should be transformational, collaborative, conflict management, shared, distributed, ethical, functional results oriented. This session will review these principles and provide the participant with options to implementing them in their facilities.

After attending this session, you will be able to:
• List five competency skills ranked most important for success in healthcare management
• Describe and list management styles and the six trends in leadership development
• Describe how to implement a variety of techniques in mentoring and coaching coworkers/employees in developing leadership skills
GENERAL SESSION 3:45 pm – 4:45 pm

2038 Coronavirus: Harmless Cold or Deadly Bug?
Philip Gray, RPT-ACCS
1.00 CE Hour

A general overview of the coronavirus will be presented including discussion on the different strains and complications in diagnostics. The presenter will also review current statistics from the Centers for Disease Control and Prevention (CDC) and the World Health Organization (WHO) and how specific precautions are being taken on the international scene.

After attending this session, you will be able to:

• Discuss the signs and symptoms of coronavirus to help specify individuals suspected of carrying the virus
• Describe how the coronavirus is transferred
• Explain precautions used in dealing with individuals suspected of carrying the virus
• Discuss predisposing factors to infection

6:00 pm – 7:00 pm  Awards Ceremony
                 Cocktail Hour

7:00 pm – 8:00 pm  Awards Banquet

8:00 pm – 10:00 pm  Awards Convocation
**Day 3**  
**Wednesday, July 15**

**GENERAL SESSION**  
9:00 am - 10:00 am

**2039 Bring Your Camera: Time for a Selfie in Telehealth**  
Suzan Perreault, Certified Telehealth Facilitator, Telehealth SME  
1.00 CE Hour

Telehealth is changing the way each of our roles view healthcare. With the dramatic growth in technology, it is only suitable that technology influence our offices and careers in the medical business. Healthcare in the rural and urban areas won’t continue in the status quo it has known, doctors and staff want a variation and patients are looking for care providers that will bring technology to help manage their care. Come away from this session with knowledge for your team, your office or yourself about how Telehealth is shaking up the medical and business fields, what the future looks like and how easy it is to apply reimbursement codes.

After attending this session, you will be able to:
- Discuss what the research is saying about Telehealth
- Recognize how Telehealth fits into your practice
- Examine where Telehealth reimbursement is applied

10:00 am - 10:30 am  
Coffee Break

10:00 am - 1:00 pm  
Delegate Credentialing

</tbody>
</table>

There is more to being a medical assistant besides vital signs and administering shots. This course looks at the real deep insides of medical assisting, how it affects you and your mental state, how to separate your emotions from your work duty, how to cope with the frustrations that arise, multitasking without clerical error, and dealing and bonding with patients while making them feel comfortable.

After attending this session, you will be able to:
- Describe how to cope with frustrations
- Explain how to multitask without making errors
- Discuss how best to relate to patients

**2041 Identification of Leukemia**  
Fred Morley, MA, BS, MT(AMT)  
1.00 CE Hour

This session will review the identification of leukemia using only light microscopy. This will aid the tech from small hospitals which do not have flow-cytometry to identify all forms of leukemia.

After attending this session, you will be able to:
- Identify and compare lymphocytic and granulocytic leukemias in small hospitals not equipped with flow-cytometry
- Compare and contrast the light microscopic examinations of all stages of lymphocytic and granulocytic leukemia
2042 **Health Disparities**
Lisa Maness, MT(AMT, ASCP)  
1.00 CE Hour

This session will cover details of the health disparities that exist between races when it comes to cardiovascular disease, cancer, and diabetes. The speaker will also discuss underlying reasons the disparities exist as presented in literature and possible solutions that may help bridge the gaps.

After attending this session, you will be able to:
- Discuss statistics on health disparities that exist among races for the major killers—cardiovascular disease, cancer, and diabetes.
- Explain how health disparities have become established in our society.
- Identify options for moving forward to reduce the health disparities.

---

2043 **Soft Skills: What Are They and How Do We Teach These to Our Students?**
Lynnae Lockett, MSN/Ed, RN, RMA(AMT), CMRS  
1.00 CE Hour

As healthcare professionals, we tend to become task oriented and become focused on completing the hands-on skills or the hard skills that need to be done and these hard skills tend to become second nature to healthcare professionals. This session will identify and define soft skills including some key important soft skills within the healthcare setting. Also provided are tips you can use in the classroom to enhance soft skills in the classroom and build better soft skills in your medical assisting students.

After attending this session, you will be able to:
- Describe soft skills.
- Explain which soft skills are needed in the workplace for medical assistants.
- Identify ways to teach soft skills in the medical assisting classroom.

---

**Day 3** Wednesday, July 15

- **11:30 am - 1:00 pm**  
  Lunch (on your own)

**EDITORS WORKSHOP**  
11:30 am - 1:00 pm

**MEET THE CANDIDATES & RESOLUTIONS**  
1:00 pm - 3:00 pm

Candidates for the AMT Board of Directors will make presentations and answer questions from AMT members. Any resolutions for discussion will be considered.

- **3:00 pm - 3:30 pm**  
  Refreshment Break

**COMMITTEE MEETINGS**  
3:30 pm - 5:00 pm

</table>
First Time Attendee Reception  
(Invitation Only)  
July 13, 2019  
6:00 pm – 7:00 pm  
Fee: Free for invited attendees  
Join your other first-time attendees for light snacks and networking with the AMT Board of Directors. Ask questions and engage in discussions on how to get involved with AMT and how the Annual Meeting works.

Welcome Party  
July 13, 2020  
7:00 pm – 10:00 pm  
Fee: $20 (included in full package registration)  
Catch up with friends and colleagues from around the country while enjoying light snacks and a cash bar. This casual and fun annual event will have you putting on your dancing shoes and kicking up your heels after a full day of learning. The Welcome Party is open to all registered attendees who have purchased a full package. Additional guest tickets can be purchased online or onsite at the registration desk.

Medical Assistant Student Challenge Bowl  
July 14, 2020  
11:30 am – 1 pm  
Fee: Free  
This event is an opportunity for medical assistant students to demonstrate their knowledge and show school pride by competing in an exciting educational competition. The Challenge Bowl is open to all medical assistant students currently enrolled in a medical assisting program and who have not taken the AMT RMA exam. The school winning the competition will receive a trophy. Teams consist of two students plus a coach/instructor from your school. Meeting registration fee will be waived for the day of competition for one coach and the two-student team.

Awards Banquet  
July 14, 2020  
Cocktail Hour: 6:00 pm – 7:00 pm  
Banquet: 7:00 pm – 8:00 pm  
Convocation: 8:00 pm – 10:00 pm  
Fee: $65 (included in full package registration)  
The Awards Banquet celebrates the achievements and excellence of AMT members both on the state and national level. More than 20 awards are presented, including the Order of the Golden Microscope (OGM), AMT’s highest medical technologist honor; and the Medallion of Merit (MOM), AMT’s highest medical assistant honor. Join your colleagues for an evening honoring the best in allied health.

OGM-MOM Dinner (invitation only)  
July 15, 2020  
7:00 pm – 10:00 pm  
Fee: Free for invited recipients  
Attendees of this event honor current and past recipients of the OGM and MOM awards.

Thursday Night Social at the Indian Pueblo Cultural Center  
Thursday, July 16  
6:00 pm – 10:00 pm  
Fee: $50  
Wrap up the meeting with your AMT friends during a one-of-a-kind engaging and educational event at the Indian Pueblo Cultural Center in downtown Albuquerque. The center is owned and operated by the 19 Indian Pueblos of New Mexico and dedicated to the preservation and perpetuation of the Pueblo Indian history, culture, and art. Transportation, dinner, one drink, museum entrance and show included with ticket price. More details about the Center can be found at https://www.indianpueblo.org/.

Please note: No silent auction will be taking place this year at the Annual Meeting.
