

# Feel Confident about Your Allied Health Professionals with AMT Certification

AMT

American Medical Technologists  
Certifying Excellence in Allied Health

Health care employers today look for allied health professionals who are certified to ensure these individuals have the skills and knowledge to be successful in their jobs. By setting certification as a workplace standard, you help ascertain that your employees not only meet federal regulatory requirements, but also function at the top of their scope of practice—bringing a higher level of value and efficiency to health care delivery. Now it's more important than ever to feel certain that your applicants were trained and certified following industry-leading standards for rigor, integrity and quality.

AMT is the only professional association that offers highest quality certification via practical routes such as on-the-job experience or schooling. AMT works directly with you to implement cost-effective solutions for certifying your staff.

## Who Is AMT?

AMT elevates allied health professionals to provide the highest levels of quality patient care. Our certification exams ensure that certificants are qualified and possess the practical job skills, technical know-how and professionalism that employers and patients both expect and deserve. We also provide educational opportunities for certificants to continue developing their competencies and make a greater impact within their health care settings. Today, AMT has more than 75,000 allied health professionals in nine distinct specialties, each of whom are full members of our nonprofit membership society.

*"AMT was my choice because they took the time to help our office with the [certification] process; it was pretty easy to get from one step to the next. I have recommended AMT to other practices."*

Sylvan Lakes Family Physicians

### AMT Certifications:

- Registered Medical Assistant
- Medical Technologist
- Medical Laboratory Technician
- Registered Phlebotomy Technician
- Certified Medical Laboratory Assistant
- Certified Medical Administrative Specialist
- Registered Dental Assistant
- Clinical Laboratory Consultant
- Allied Health Instructor

## Why Choose AMT Certification?

### It's Flexible

AMT offers a "work route" to certification for the following allied health professionals: medical assistant, phlebotomy technician, medical administrative specialist, dental assistant and medical lab assistant. AMT certification recognizes the value of real-world experience, which can be applied toward meeting the requirements.

### It's Low Hassle

AMT has developed a streamlined process for employers of allied health professionals to help staff get certified. We assist by providing exam prep materials, detailed status reports, bulk purchasing options and reports to track ongoing maintenance of certification. AMT has helped many thousands of professionals gain certification through their employers.

### It's Rigorous

The exams for AMT certification are developed and administered using state-of-the-art methodologies managed by our in-house staff of psychometricians and overseen by volunteer subject matter experts who work in a variety of practice settings. The integrity of the certification exam is maintained by partnering exclusively with Pearson VUE, a computer-based exam administrator with an international reputation for both security and accessibility.

### It's Dependably Affordable

As part of our mission as a non-profit professional association, AMT consistently has lower costs for certification and membership compared to other professional associations and certification agencies. AMT has been committed to the allied health profession since 1939, and we continue to grow our membership of more than 75,000 currently certified members.

## Lifelong Career Partner

As a professional membership association, AMT supports those we certify throughout their careers.

### Maintenance of Certification

Newly certified individuals are expected to document their learning activities supporting AMT certification on a three-year cycle. This process is intended to promote, encourage and reward allied health professionals who demonstrate efforts to maintain their competencies.

### Professional Development

AMT offers an array of education resources to help our certificants stay ahead of changes in practice and master the competencies needed to be successful in their jobs. At every stage of their development, AMT offers career assistance, leadership opportunities and recognition for our members.

### Networking with Peers

From national meetings to local events, AMT members gain access to colleagues and industry experts for personal and professional growth and interaction. Many employers support their employees by assisting with fees and/or allowing time off to participate in local, national, or online continuing education opportunities.

### Multiple Credentials

AMT offers an array of certifications for allied health. Our nine distinct professional credentials offer variety and choice at the same high standards. Some training may prepare allied health professionals for multiple certifications, such as medical assisting and phlebotomy. Contact us for more information about stacked credentials at [srp@americanmedtech.org](mailto:srp@americanmedtech.org).
