

# AMT Candidate Handbook

AMT certification gives you the advantage  
you need to advance your career

**AMT**  
American Medical Technologists  
Certifying Excellence in Allied Health

---

**American Medical Technologists** is a nationally-recognized, not-for-profit certifying agency for health practitioners who meet entry-level education, experience, and examination requirements.

Compliance with eligibility requirements results in the issuance of a certificate and membership in American Medical Technologists (AMT).

## **GENERAL INFORMATION**

### **American Medical Technologists**

American Medical Technologists (AMT) is a national agency that certifies examination-based primary designations of healthcare personnel: medical technologists, medical laboratory technicians, office laboratory technicians, medical assistants, phlebotomy technicians, dental assistants, and medical office administrative specialists. The organization's purpose is to help protect the welfare of the public by maintaining competency standards in these occupations.

As an accredited member of the National Commission for Certifying Agencies (NCCA), a division of the Institute for Credentialing Excellence (ICE), AMT adheres to a number of rigorous criteria regarding the conduct of its credentialing programs. All AMT certification examinations are constructed and administered in accordance with methodologies recognized by both psychometric and credentialing communities.

### **Purpose of the Certification Examinations**

AMT certification examinations are intended to evaluate the competence of entry-level practitioners. The tests address content areas defined and validated by subject-matter experts, educators, and individuals working in their respective fields. As the tests provide only one source of information regarding examinee competence, they are used in conjunction with other indicators of training and experience in the granting of certification.

## **APPLYING FOR CERTIFICATION**

### **1. The Application Process**

**Obtain the application and review the eligibility requirements** for the designation in which you seek certification. The application may be

completed online at:  
**[www.americanmedtech.org](http://www.americanmedtech.org)**.

- 2. Review the *Candidate Handbook* prior to completing the application.** The *Handbook* outlines important information and requirements to which all applicants must comply.

When submitting an application, candidates must pay close attention to the documentation required. Also, it is the candidate's responsibility to stay informed of the progress of the application via the AMT website and to assist in the timely response of references and employers. Candidates should allow sufficient time for application review and processing (normally 2 – 3 weeks). Candidates are encouraged to submit the application and required documentation as early as possible to allow for unanticipated delays. Applicants applying for special accommodations should allow additional processing time (up to 30 days) and must submit appropriate documentation as outlined in a subsequent section of this handbook. Appeals for denied applications may be filed according to the stipulations outlined in a subsequent section of this handbook. Application fees are **NOT** refundable.

- 3. Wait for emailed confirmation from AMT indicating that you have been approved to test.** When a candidate's application is complete and has been approved by AMT, an *Authorization to Test* letter will be issued. The correspondence will include all details necessary to schedule an examination administration.
- 4. Schedule a test administration session.** All AMT examinations are administered on computer at Pearson VUE testing center. Appointments at the testing centers may be made after receiving an "Authorization to Test" letter from AMT. Candidates are

advised to make appointments to test as soon as practical, to allow for the selection of a time, date, and test center location that best accommodates their schedules.

#### 5. Attend the examination

**administration.** Detailed information regarding test administration provisions and requirements is provided in this handbook.

#### 6. Receive examination results.

Candidates examined by computer-based testing (CBT) receive results immediately upon completion of the test administration session. Results will not be issued via telephone, facsimile transmission, or emails, under any circumstances.

#### Non-Discrimination Policy

Qualified applicants are considered for certification without regard to race, color, religion, gender, national origin, age, marital status, medical condition, or disability.

#### Application Appeals Procedure

Applicants deemed ineligible to sit for an AMT certifying examination have the opportunity to appeal that decision.

##### *I. Appeal to the Examinations, Qualifications, and Standards Committee*

An applicant may appeal the decision of the AMT Office Staff to the Examination, Qualifications, and Standards (EQS) Committee by writing the Committee within 60 days of notification of the Staff decision. The applicant may submit any documentation deemed necessary to support the appeal. The EQS Committee may meet in person or by telephone to discuss the appeal. The Committee may allow the applicant to be present at a personal meeting, if one is held, or may talk to the individual by telephone. All of the applicant's expenses pertaining to the appeal will be borne by the applicant. The Committee will notify the applicant in writing

of its decision within 120 days of receipt of the original written appeal.

##### *II. Appeal to the AMT Board of Directors*

Applicants may appeal the decision of the EQS Committee to the AMT Board of Directors by writing to the President of the Board within 60 days of notification of the Committee decision. The applicant may submit any documentation deemed necessary to support the appeal. The Board may meet in person or by telephone. The Board may allow the individual to be present at a personal meeting, if one is held, or may talk to the applicant by phone. All of the applicant's expenses pertaining to the appeal will be borne by the applicant. The Board will notify the applicant of its decision in writing within 120 days of receipt of the written appeal. The decision of the Board of Directors is final.

##### *III. AMT Board of Directors Options*

The fundamental decision of the Board will be to affirm or overturn the Office Staff decision. However, the Board may also opt to make other decisions deemed appropriate.

#### EXAMINATION ADMINISTRATION THROUGH COMPUTER-BASED TESTING (CBT)

##### **General Information**

All AMT CBT is administered under contract with Pearson VUE. Pearson VUE testing centers are available at several hundred locations in the United States, its territories and overseas locations. Complete and current information regarding domestic Pearson VUE sites can be reviewed at the website: [www.pearsonvue.com/amt](http://www.pearsonvue.com/amt). This site also provides maps and driving instructions to each testing center.

##### **Authorization to Test**

Once a candidate's Application for Certification is complete and has been officially approved by AMT, an *Authorization to Test* letter is posted on the candidates home page. At the same time, AMT sends

Pearson VUE an electronic authorization indicating which candidates are approved and eligible for examination. Upon receipt of the *Authorization* letter domestic candidates may logon to [www.pearsonvue.com/amt](http://www.pearsonvue.com/amt) or call Pearson VUE directly at 888-846-6941 to schedule an examination time and place. The letter contains the telephone number and other important testing information.

### **Examination Security and Test Administration Regulations**

To ensure that all AMT candidates are examined under comparable conditions employing fair and accurate testing methods, it is essential that testing environments be standardized. In addition to other provisions outlined in this booklet, the regulations below seek to achieve test standardization and augment test security. No cellular phones, beepers, pagers, cameras, photographic or video equipment, transmitters, or electronic equipment of any type is allowed in the testing room. No papers, books, textbooks, notebooks, notes, unauthorized scratch paper, calculators or food are permitted in the testing room. Eating, drinking, and tobacco use are prohibited. Any violation of the testing policies and procedures outlined in this booklet may result in dismissal from the testing center, invalidation of examination results, and forfeiture of eligibility to test and associated fees.

### **Policy Regarding Eyeglasses**

The check-in procedure at computerized test centers includes an inspection of eyeglasses. Prior to admittance, examinees will be required to remove eyeglasses (or present eyeglasses intended for use) and show them to the test center administrator for inspection without handing them to the administrator. In addition, Google Glass and other similar technologies are prohibited. Eyeglasses not passing inspection and Google Glass will not be permitted in the examination room under any circumstances.

### **The Day of the Examination**

Examinations are administered as scheduled in advance with Pearson VUE. It is advisable to bring a watch. Examinees are not permitted to continue taking the test beyond the established time limit.

Visitors are not permitted in the examination room. Calculators are not allowed in the examination room and are not necessary. The examination questions are so constructed that all numerical calculations may be performed by hand. In addition, scratch paper should not be necessary.

### **Promptness**

Examinees are advised to be at the administration site at least 30 minutes prior to the scheduled examination time to allow for check-in. Examinees arriving late may be refused admittance by the Pearson VUE proctor. Should this occur, the candidate will be required to pay a reexamination fee and reschedule another testing appointment.

### **Identification**

In order to be admitted into a Pearson Testing Center candidates **MUST** bring two forms of matching Identification, both original, valid, bearing name and signature and at least one with a photograph. Acceptable photo identification is limited to: VALID Drivers License; Passport; VALID Military Identification; or State Identification Card (Benefits, FOID, Firearms, Concealed Carry cards are not valid for this purpose). The secondary identification must contain name and signature. Expired IDs are not acceptable, unless accompanied by valid renewal papers. **Examinees must ensure that all identification matches the information on the authorization letter.**

**Examinees not providing acceptable identification will be refused admittance to test and will be required to pay a reexamination fee and reschedule another testing appointment.**

**Time Limit for Computerized Testing**

Examinees have established timeframes in which to complete the examination (see below):

- Dental Assistant – 2.5 hours
- Medical Administrative Specialist – 2.0 hours
- Medical Assistant – 2.0 hours
- Phlebotomy Technician – 2.5 hours
- Medical Technologist – 3.5 hours
- Medical Laboratory Technician – 3.0 hours
- Medical Laboratory Assistant – 2.5 hours
- Molecular Diagnostics Technologist – 3.0 hours

**Rescheduling Policy**

Examination appointments may be rescheduled without fee by contacting Pearson VUE no later than one full business day prior to the scheduled appointment.

**For example, a candidate wishing to cancel an appointment for 10AM on a Monday morning would need to contact Pearson by 10AM Friday morning. Candidates must speak directly to Pearson VUE Call Center staff to authorize appointment cancellations.** If

you cancel online (preferred) you must ensure you complete the entire process and receive the email notification that your exam has been cancelled. If no confirmation email is received, the exam has NOT been cancelled. There is no charge for rescheduling if the change is made at least one business day prior to the appointment.

**Cancellation Policy**

Examination appointments may be  canceled without fee by contacting Pearson VUE no later than one business day prior to the scheduled appointment (see example above). There is no charge for canceling if the change is made at least one business day prior to the appointment. Candidates canceling appointments after one business day prior to a scheduled appointment will forfeit their full testing fee and will be assessed a retesting fee.

**IMPORTANT INFORMATION FOR ALL EXAMINEES****Questionable Test-Taking Behavior**

Proctors have been given specific instructions regarding questionable test taking behavior, or "cheating." Such behavior includes but is not limited to: examinees copying from one another, speaking to one another during the administration or copying from notes. Proctors have been instructed to immediately terminate the examination for those individuals in question. Examinations terminated under such circumstances will be invalidated and the examinee will be subject to the policies outlined in this booklet.

**Examinee Agreement Regarding Score Cancellations and Confidentiality**

*By applying and sitting for an AMT certification examination, all candidates agree to the following policies:*

**1. Validity Assurance and Score**

**Cancellation** - AMT reserves the right to cancel any examination score if, in AMT's professional judgment, there is any reason to question the score's validity. Circumstances warranting score cancellation may include, but are not limited to: copying from notes or from another examinee's answers; speaking or otherwise communicating with others during the test administration; aiding or receiving aid from other examinees; consulting study aids of any type during the exam; copying, transcribing, or otherwise reproducing test materials; removing test materials from the examination room; or having improper access to AMT exam content prior to the exam administration. Significant score increases upon retesting may also be investigated to ensure the authenticity of results. Misconduct may disqualify you from all future examination attempts and from AMT certification.

## **2. Exam Confidentiality and Non-Disclosure Agreement**

The content of all AMT certification exams is copyrighted and is the property of AMT. Exam materials will be provided to you on a temporary basis for the sole purpose of testing your knowledge and competency in the discipline for which you seek certification. You are required to return any exam materials to the test administrator immediately after completing the exam, and you are prohibited from using or possessing AMT examination content for any other purpose or at any other time. You agree not to disclose, publish, copy, reproduce, transmit or distribute exam content, in whole or in part, in any form or by any means, for any purpose, without the express prior written authorization of AMT's Director of Testing and Competency Assurance. The unauthorized disclosure, publication, copying, reproduction, transmission, distribution or possession of exam content or materials in any form is a **crime** and may subject you to civil liability and/or criminal prosecution.

### **Special Accommodations**

AMT is committed to ensuring that no individual is deprived of the opportunity to take an examination solely by reason of a disability. Special accommodations may be provided for candidates with documented disabilities. Candidates requesting special provisions must state their needs in writing when applying to take the examination. Requests should include (but are not limited to): 1) medically supported documentation of the disability, 2) accommodations requested for the examination, and 3) descriptions of past accommodations provided in other cases.

The computer-administered AMT examination tests the examinee's base of knowledge related to a certification discipline. The examination is combined with other indicators of competence in the larger certification process for a specific job function.

Accordingly, no candidate will be excused from the knowledge-based examination or offered a modification that would compromise the examination's ability to assess the skills and knowledge it is designed to measure. Similarly, no auxiliary aid or service will be provided that will fundamentally alter the examination or will result in an undue burden to AMT.

Whenever possible, the AMT Office will determine applicant eligibility for special provisions. Candidates should allow the AMT Office reasonable time (up to 30 days) to review the request, and if warranted, make provisions to provide an accommodation. The proctor will be notified if special considerations are granted.

## **EXAMINATION RESULTS**

### **Scoring Procedures**

All computerized examinations are scored immediately by the computer. This scoring method allows for both a high degree of quality control with respect to the accuracy of results, in addition to absolute objectivity with respect to scoring.

### **Scores and Score Reports**

Following examination scoring, examinees receive a letter notifying them of their examination performance. Passing examinees receive a letter indicating the passing score on the examination (70) and their obtained scale score only. Failing examinees receive a letter containing the same information, in addition to information regarding the sub-sections of the test in which they obtained low scores. Failing examinees may consider these areas of weakness in preparation for retesting.

Although there are 200-230 questions on the examination, the minimum passing score on the examination is translated into the number 70, on a scale ranging from 0 to 100. This system of "scaled scores" is used to provide a common scale for reviewing and reporting test results across examinees, and across different forms of the same test.

It is important to note that 70, and the scores that examinees receive, are neither percentages of questions, nor numbers of questions answered correctly. Rather, these are points on a 0 to 100 scale. Therefore, a score of 99 would NOT indicate that 99% of the questions were answered correctly, or that 99 questions were answered correctly.

### **Processing Time**

Examination results are available immediately upon completion of computer-administered examinations. Test results appear on the screen and a paper copy of the results are provided by the proctor. In addition, results are provided to examinees **in writing only**, and are **not available by telephone**.

### **Retesting**

Because performance is evaluated with respect to all content areas, failing candidates who choose to retake the test are required to retake the entire examination. Candidates can retake the examination three additional times after the first failure, up to a total of four (4) times, for that certification. After failing any test, it is recommended that candidates study all areas in which mastery of the material was not achieved (as indicated on a failing score report) before reattempting a test. A retesting fee is required.

## **EXAMINATION DEVELOPMENT**

AMT's **Examination, Qualifications, and Standards Committees (EQS)** develop all certification examinations. Each certification designation has a respective committee of subject-matter experts that is responsible for constructing examinations within its discipline. In addition to generating and updating specifications on which the examinations are based, the Committees write test questions and review questions submitted from other sources (questions are submitted by instructors, experts, practitioners, and other individuals

associated with a specific occupation). The Committees also determine certification requirements and address standard-setting issues related to their respective credentials. After construction by the expert committees, examinations are subsequently reviewed and approved by the primary EQS Committee under the auspices of the American Medical Technologists Board of Directors.

### **The Competency Outline**

American Medical Technologists administers "competency-based" certification examinations. A competency-based testing strategy involves assessing whether or not examinees possess the skills and knowledge required for successful performance in a particular job role.

The first step in the development of this type of test is to define the work role by listing the areas in which a certificant must be competent. Such a list may include a variety of aspects addressing knowledge of procedures, knowledge of theories, and application of theories, in addition to a number of other knowledge and skill-related statements.

In the development of examinations, the EQS Committee begins by constructing a draft of the competency (or task) inventory. The preliminary list is then circulated to a random sample of practitioners to obtain their input. The competency outline presented for each discipline represents the consensus of experts and practitioners regarding the composition of the respective work role. (The outline is actually a summary of a more detailed task inventory.)

Once the list of competencies required for successful practice is developed, test questions are written to address each competency. The items are then classified in terms of several dimensions and entered into a computerized item bank. As the number of written test questions far exceeds

the number of questions allowable on a particular test, examinations contain only a sample of items (therefore referencing only a sample of competencies). However, during test construction, the items are drawn from the bank in such a way as to ensure that representative samples of competencies are assessed.

The summary content outline presented for each certification describes the knowledge and task areas considered by American Medical Technologists to comprise the practitioner work role. Given the development of thorough and appropriate competency lists, and the selection of item samples adequately representing requisite competencies, valid tests for practitioner certification may be constructed. Through the employ of subject-matter experts, practitioner input, and extensive test validation research, American Medical Technologists continually strives to maintain sound, updated examinations.

### **EXAMINATION FORMAT AND CONTENT**

#### **Examination Format**

AMT certification examinations consist of 200-230 four-option, multiple-choice items. Examinees are required to select the single best answer from among the four alternatives. Multiple answers for a single item are scored as incorrect. Test items may require examinees to recall facts, interpret graphic illustrations, interpret information presented in case studies, analyze situations, or solve problems.

#### **Examination Content**

The general content outline for the certification examination can be found on the AMT website. The percentages of questions indicated for each content area should be considered reliable, but approximate.

#### **Pretest (Pilot) Questions**

AMT examinations may contain pretest items that are unscored questions embedded in the test. AMT uses data gathered in this manner to evaluate new, unused questions prior to use on future

certification examinations. Pretest questions are not identified in the test and they appear just like any other question. The total time allowed for testing takes the presence of pretest items into consideration. Time is allowed to answer these questions. As pretest items are unscored, candidates' answers to these questions will not affect test scores.

### **EXAMINATION PERFORMANCE STANDARDS**

#### **Criterion-referenced Examinations**

AMT certification examinations are competency-based, criterion-referenced examinations. As such, they may be different from typical tests that most examinees may have taken.

Traditionally, many tests are scored or graded "on the curve." To obtain an "A" an examinee is only required to perform better than the rest of the people in the group who take the test. Criterion-referenced examinations (including those employed by AMT) do not use the group for determining performance, but rather an external standard called the "criterion." Examinee performance is evaluated against this standard to determine if an individual's score is sufficiently high to indicate competence to begin working in the field as a professional.

#### **Setting the Criterion (passing score)**

To determine the criterion or "passing score," each examination item is reviewed independently by qualified, experienced individuals in the field. The experts on the EQS Committee then evaluate the difficulty of each individual examination item to determine the passing score.

The interested examinee may consult the following reference for a more detailed discussion of the method: Livingston, S.A., & Zieky, M.J. (1982). Passing Scores: A Manual for Setting Standards of Performance on Educational and Occupational Tests. New Jersey: Educational Testing Service.

The advantage of a criterion-referenced examination is that the focus changes from the question: "Is this individual better (or worse) than the rest of the group being tested?" to: "Is this individual sufficiently competent, based on this examination, to be allowed to practice in the profession?"

For additional information regarding the passing score determination methodology related to specific AMT certification examinations see:

Addendum A – MT/MLT/RMA Certification Examinations

Addendum B – RPT/RDA/CMLA/CMAS Certification Examinations

Addendum C – Passing Rates

### **Passing the Examination and Reexamination**

The minimum passing score for an examination is translated into the number 70 (on a scale ranging from 0 to 100). To pass the examination, a candidate must obtain a scaled score of 70 or greater. Although the examination consists of several distinct content areas, evaluation of test performance is based on the total score that a candidate obtains, combined across all content sections. Because performance is evaluated with respect to all content areas, failing candidates who choose to retake the test are required to complete the entire examination. Candidates are allowed to retake the examination three additional times after the first failure. After failing any test, it is recommended that candidates study all areas in which mastery of the material was not achieved (as indicated on a failing score report) before reattempting a test. A retesting fee is required.

Candidates may take an examination for a specific certification discipline a maximum of four times. Applications remain active for one year. Candidates wishing to be examined after an application has expired will be required to submit a new application in addition to any required documentation.

## **MAINTENANCE OF EXAMINATION QUALITY AND TEST SECURITY**

### **Collection and Review of Statistical Indices**

After each examination is scored, statistical reports are generated that show how each question in the test performed. The results of these analyses are reviewed by members of the EQS Committee. The Committee or its designate makes a final determination regarding the suitability of a particular question, and the answer to the question.

### **Examination Development**

Test items retained in the AMT item bank are regularly reviewed and evaluated. Necessary changes or deletions are made to update content and relevance. New items added to the bank proceed through numerous reviews and evaluations before approval and acceptance. Certification examination development is the direct responsibility of the EQS Committees.

In constructing different forms of a test, a change in an individual item does not alter the balance of the complete examination. The subject matter, examination passing score and other data for each item are considered when constructing an examination. This provides all examinees with consistent and comprehensive examinations. Candidates may be assured that the content of the examination and the required level of performance will be similar in all administrations. Test validation research is periodically conducted to ensure that the content of examinations is current and relevant to each certification designation. Furthermore, comprehensive statistical summaries are prepared annually to assess the performance outcomes of all examinations administered.

### **Examination Security**

All examinations administered by AMT are processed with the highest degree of security allowable. All examination administrations are conducted under strict direction of proctors. Test documents are

handled at the AMT Office under secure conditions.

## **CERTIFICATION**

### **AMT Certification**

Candidates who meet all application requirements, pass the certification examination, and comply with policies and provisions for their respective disciplines may become certified by AMT. New certificants receive materials and information describing the benefits and responsibilities of being certified by AMT, in addition to a membership certificate and wallet card. Candidates should be aware of several key policies that are relevant following the granting of certification to include: The Certification Continuation Program (CCP), The Standards of Practice, and the Disciplinary Policy.

### **Certification Continuation Program (CCP)**

The Program requires all new certificants to participate in, and document activities supporting the continuation of AMT certification every three years. In meeting this requirement, certificants are required to accrue continuing education through the following qualifying activities: Professional Education, Formal Education, Employment Verification, Authorship of Written Works, Instructional Presentations and Organizational Participation. In addition, certificants must comply with the AMT Standards of Practice. Certificants will receive reminders via mail and email regarding their compliance with the Program, throughout the years. Members are encouraged to use AMTrax to track their CE and other related activities. Certificants must comply with required program elements to remain certified. Individuals not in compliance with the CCP policy are not considered by AMT to be certified.

### **Standards of Practice**

The American Medical Technologists is dedicated to encouraging, establishing

and maintaining the highest standards, traditions, and principles of the disciplines which constitute the allied health professions of the certification agency and the Registry.

Members of the Registry and all individuals certified by AMT recognize their professional and ethical responsibilities, not only to their patients, but also to society, to other health care professionals, and to themselves.

The AMT Board of Directors has adopted the following Standards of Practice which define the essence of competent, honorable and ethical behavior for an AMT-certified allied health care professional. Reported violations of these Standards will be referred to the Judiciary Committee and may result in revocation of the individual's certification or other disciplinary sanctions.

- I. While engaged in the Arts and Sciences that constitute the practice of their profession, AMT professionals shall be dedicated to the provision of competent and compassionate service and shall always meet or exceed the applicable standard of care.
- II. The AMT professional shall place the health and welfare of the patient above all else.
- III. When performing clinical duties and procedures, the AMT professional shall act within the lawful limits of any applicable scope of practice, and when so required shall act under and in accordance with appropriate supervision by an attending physician, dentist, or other licensed practitioner.

- IV. The AMT professional shall always respect the rights of patients and of fellow health care providers, shall comply with all applicable laws and regulations governing the privacy and confidentiality of protected healthcare information, and shall safeguard patient confidences unless legally authorized or compelled to divulge protected healthcare information to an authorized individual, law enforcement officer, or other legal or governmental entity.
- V. AMT professionals shall strive to increase their technical knowledge, shall continue to learn, and shall continue to apply and share scientific advances in their fields of professional specialization.
- VI. The AMT professional shall respect the law and pledges to avoid dishonest, unethical or illegal practices, breaches of fiduciary duty, or abuses of the position of trust into which the professional has been placed as a certified healthcare professional.
- VII. AMT professionals understand that they shall not make or offer a diagnosis or dispense medical advice unless they are duly licensed practitioners or unless specifically authorized to do so by an attending licensed practitioner acting in accordance with applicable law.
- VIII. The AMT professional shall observe and value the judgment of the attending physician, dentist, or other attending licensed practitioner, provided that so doing does not clearly constitute a violation of law or pose an immediate threat to the welfare of the patient.
- IX. AMT professionals recognize that they are responsible for any personal wrongdoing, and that they have an obligation to report to the proper authorities any knowledge of professional abuse or unlawful behavior by any party involved in the patient's diagnosis, care and treatment.
- X. The AMT professional pledges to uphold personal honor and integrity and to cooperate in protecting and advancing, by every lawful means, the interests of the American Medical Technologists and its Members.

#### **Disciplinary Process and Revocation of Certification**

AMT certificants will be disciplined, if necessary, under Articles IX and XI of the AMT National Bylaws and the standing Disciplinary Policy approved by the AMT Board of Directors.

## RESOURCES

### **Content Outlines - Examinations:**

Content outlines for examinations in a specific certification may be found on the AMT website at [www.americanmedtech.org](http://www.americanmedtech.org) in the Certification section under the individual certification of interest.

### **Content Outlines – Practice Examinations:**

Practice examinations for the certification being sought may be found on the AMT website at [www.americanmedtech.org](http://www.americanmedtech.org) in the Certification section under the individual certification of interest.

### **Reference Material and Publications:**

Reference material for certification being sought may be found on the AMT website at [www.americanmedtech.org](http://www.americanmedtech.org) in the Certification section under the individual certification of interest.

### **Practice Examinations:**

Practice examinations are available for order and purchase on the AMT website at [www.americanmedtech.org](http://www.americanmedtech.org).

## ADDENDUM - A

### EXAMINATION DEVELOPMENT: MT, MLT, AND RMA

#### Setting the Criterion (passing score)

Item raters begin by identifying which answer choices the minimally-competent, entry-level individual should be able to eliminate as clearly incorrect. The number of remaining answer choices determines the probability of choosing the correct answer. The average of all reviewers' judgments determines the Minimum Passing Level (MPL) of each test item.

For example, if it is determined that the minimally-competent examinee could eliminate one of the answer choices as clearly incorrect, he would then be selecting from among the three remaining choices. His chances of selecting the correct answer would be 1 out of 3, or .33. This number is the MPL for the question. If he could eliminate two answer choices as clearly incorrect, he would then be selecting from the two remaining choices. His chances (the "odds") of selecting the correct answer then become 1 out of 2, or .50. For example:

- The bone in the thigh is the
- \* A) femur.
  - B) tibia.
  - C) radius.
  - D) humerus.

For example, the minimally competent medical assistant should be able to immediately recognize C) and D) as arm bones, thus eliminating those choices as being clearly incorrect. He might then need to mentally review his knowledge of anatomy to recall the positions of the leg bones, thus making his final selection of the correct answer from either A) or B). In this case, his odds are 1 in 2. The MPL for this item would be .50.

The "odds" of answering an item correctly can be thought of as the item's difficulty. Each item has its own difficulty value (MPL). Therefore, a complete examination is composed of items of various difficulties.

After the committee has reviewed each item, indicating which of the four responses to each item the minimally competent examinee should be able to perceive as incorrect, the judges' ratings are pooled to obtain the minimum passing level (MPL) for each test item. The MPL settings for all items appearing on a particular examination then are totaled to determine the minimum passing level (MPL) for the entire examination. This procedure is done before the administration of an examination.

All AMT examinations have 200-230 items, but consider the following hypothetical 5-item test:  
Item Minimum Passing Level (MPL)

Item A	.50
Item B	.33
Item C	.25
Item D	1.00
Item E	<u>.50</u>

2.58 = Passing score or MPL for the test (rounds to 3 out of 5).

An examinee's "raw score" is determined by summing the number of items answered correctly. Examinees with scores exceeding the test MPL pass the test. Examinees with scores falling short of the MPL fail the test.

All raw scores (and the MPL) are then converted to standard scores through a linear transformation. This statistical procedure provides a common scale for reviewing and reporting results.

The advantage of a criterion-referenced examination is that the focus changes from the question: "Is this individual better (or worse) than the rest of the group being tested?" to: "Is this individual sufficiently competent, based on this examination, to be allowed to practice in the profession?"

### EXAMINATION DEVELOPMENT: RPT, RDA, CMLA, CMAS

#### Setting the Criterion (passing score)

The following outlines the method used for determining passing scores for AMT tests:

1. The Examination, Qualifications, and Standards Committee assigns a difficulty value each question.

Each item on the test is of multiple-choice form (four options, one being the correct answer). Prior to administering the examination, each member of the Committee reviews every test question, indicating the probability that an entry-level, minimally-competent examinee will answer an item correctly. Probabilities are assigned using a scale range of .25 to 1.00, in increments of .05 (the lower bound of the scale is .25, to represent "chance probability" for a four-option test item).

To help make the rating task more concrete, the judges may consider a hypothetical group of 100 entry-level, minimally-competent examinees. From this group, raters are asked to consider the number of examinees that would answer a particular question correctly. In assigning ratings, the judges may draw upon their own expertise, and/or consider statistical information regarding the prior performance of an item.

Consider the difficulty rating assigned by a judge, to the following question:

The planet nearest the sun is

- A) Jupiter
- \*B) Mercury
- C) Earth                      Probability .65
- D) Venus

This rater indicated that an entry-level, minimally-competent examinee has a 65% (.65) probability of answering the item correctly. This number reflects the difficulty level for the question (.25 would represent a difficult question, and 1.00 would represent a relatively easy question). Similar responses are obtained from each judge. The arithmetic mean across raters is calculated, to yield one difficulty value per question.

The average rating for each item is pooled (in a computerized database) with the item on a permanent or semi-permanent basis. Therefore, when an item appears on a subsequent test form, it will carry a difficulty rating from the prior review. The "minimum passing level" (MPL) for each item is reviewed during the construction of subsequent forms and is modified or reevaluated if necessary.

2. An overall difficulty level for the examination is calculated.

The final passing score, or the minimum passing level (MPL) for a test is simply the sum of the difficulty values for each individual item. For example, consider a five-item test comprised of items of the following difficulties:

	Difficulty
Item A	.50
Item B	.25
Item C	.65
Item D	1.00
Item E	<u>.50</u>
	2.90

The passing score for the test would be 2.90 (which, in this example, would be rounded to 3 questions). Fractional test MPLs are rounded such that numbers over .5 are rounded to the next largest integer, and numbers under .5 are rounded to the next smallest integer. The examination passing score is not adjusted after the above determination is made, with the exception of the deletion of items pending statistical item analyses. The careful review of item analyses helps ensure the integrity of the passing level.

3. Examinee performance scores are calculated.

An examinee's "raw score" is determined by summing the number of items answered correctly. Each question answered correctly is worth one raw score point. Examinees with scores exceeding the test MPL pass the test. Examinees with scores falling short of the MPL fail the test.

All raw scores (and the MPL) are then converted to standard scores through a linear transformation. This statistical procedure provides a common scale for reviewing and reporting results.

The advantage of a criterion-referenced examination is that the focus changes from the question: "Is this individual better (or worse) than the rest of the group being tested?" to: "Is this individual sufficiently competent, based on this examination, to be allowed to practice in the profession?"

## FREQUENTLY ASKED QUESTIONS ABOUT COMPUTERIZED TESTING AT AMT

- **Where are computerized tests administered?** Pearson VUE testing centers are available at several hundreds of locations in the United States, its territories and at sites worldwide. Complete and current information regarding testing sites may be found at [www.pearsonvue.com/amt](http://www.pearsonvue.com/amt).
- **How frequently are tests administered?** Tests are available nearly every day of the year, except Sundays and Holidays. Contact your local testing center for availability.
- **When am I authorized to contact Pearson VUE and schedule an administration time?** When your completed AMT certification application and supplemental information has been reviewed, and approved as complete, you will receive an authorization letter. You may then contact Pearson VUE to schedule a date and time to take your examination. The BEST way to schedule your examination is on-line at [www.pearsonvue.com](http://www.pearsonvue.com).
- **What identification will I need for admittance into the Pearson VUE testing center?** You will need two forms of valid identification, both bearing your signature and at least one (1) bearing your photo. (Photo identification is limited to: driver's license; state-issued Identification card; military identification or passport). **Ensure that the information on your identification matches the information on your authorization letter to avoid being turned away and assessed a retesting fee.**
- **Are calculators permitted in the test administration area?** Calculators are neither permitted nor required when taking your test.
- **When are my computerized test results available?** Your score is available moments after completing your test. A paper copy of your results letter is provided to you before leaving the testing center.
- **How soon may I retake an examination after an unsuccessful attempt?** Examinations may be rescheduled and retaken 45 days after the failed attempt.
- **What if I have other questions that are not addressed here?** For other questions contact the AMT Registrar at (847) 823-5169 or visit: [www.americanmedtech.org](http://www.americanmedtech.org)

**Good Luck on Your Certification Examination!**
