

Note to California Phlebotomist Applicants

California REQUIRES that all Phlebotomy Technicians or Phlebotomists who work in California hold a California Phlebotomy License. One of the requirements of licensure is that all Phlebotomists must take and pass a Phlebotomy certification examination from an approved certifying organization. ***AMT is approved as a certifying organization by the State of California.***

Please note that submitting the AMT application to take the approved AMT Registered Phlebotomy Technician (RPT) examination DOES NOT double as the application for the State of California. ***A separate application must be submitted to the State (only the application, no exam would be required if taking the AMT exam).***

For more information on how to apply to the State of California, visit the California Department of Public Health: <https://www.cdph.ca.gov/Programs/OSPHLD/LFS/Pages/Phlebotomist.aspx>
